

Dear sir, madam,

Can you please register my opposition to bill to HP 3063, that would eliminate personal belief and religious exemptions to vaccines for all children attending public, private, parochial, and charter schools.

Scientific knowledge changes over time. I believe parents should be able to choose which vaccinations they choose for their children and which they choose not to have for their children. Making all the different vaccinations mandated by *science" at any given time seems draconic. People should be free to make there own decisions even "wrong ones*.

Thanks Shaun Kelly, 4836 NE Everett see, Portland, Oregon 97213
