

Dear Chair Greenlick and Members of the House Health Committee,

I'm a student midwife at a birth center in Oregon and am originally from the Netherlands, where all women regardless of income have access to midwifery care ( which is the standard of care for low-risk pregnant women in the Netherlands ), paid through insurance.

Please vote yes on House Bill 2845 so that women in Oregon can also have access to safe ( proven by research to have better outcomes ! ) and cost effective midwifery care.

Thank you for supporting pregnant women & babies by voting YES on HB 2845

Warmly,

Mischa Orbons , student midwife.
