

To our Oregon Representatives,

I want to come today to the hearing at 3 (a very difficult time, lots of conflicts with my Kids' after school activities) but I have a bad cold and hate to spread these germs. Please hear my voice in spite of my laryngitis.

I AM NOT AN ANTI-VAXXER we vaccinate in our family, but slowly and carefully, and yes, with extra out-of-pocket expenses.

I do believe that vaccines need to be administered according to a much more careful schedule than is currently CDC policy.

This Bill takes away parental rights.

This Bill forces all children, regardless of their state of health, to comply with the same schedule & receive the same shots, and there is actually plenty of scientific proof that this will harm Oregonians' long-term health, individually and collectively, and insodoing, our future!

They did this in California and people are leaving the state because of it, I know two families with auto-immune diseases for whom Mandatory Vaccination was the last straw and they recently fled, not to here, sadly, because they see Oregon as just one or two steps behind California politically. Not good! California is a mess, and we do not want to be forced into its footsteps.

Please heed the many voices coming to you today and vote No on HB3063

Respectfully, and hopefully!

Marlene Wendell
