

To the Honorable Members of the Joint Committee on Carbon Reduction,

Please support HB2020.

My name is Mark R. Furler. I own forest land in Curry County OR.

We, along with the rest of the State, are already experiencing the impacts of climate change. Wildfires are a real problem every summer. And last year we suffered from the smoke from wildfires farther away. So even if we don't have to think about our place burning down one year we still have to deal with not being able to breathe.

We should have done this years ago. I hope it is not too late. I urge you to vote for HB2020.

Sincerely,

Mark R. Furler
