

I support Clean Energy Jobs, not coal, not oil, especially fracked oil and gas. The old energy products just pollute the earth and water, not to mention what fracking does to the earth itself. I have seen too many tv ads pushing Pembina so they can expand the terminals for dirty energy, while promoting themselves as nice people who care about our community. Hog wash. I worked for large corporations and I know how they operate, tell what you want to hear and do what they want to do the make more money at the communities expense.

We need to concentrate on clean energy which will also bring more jobs and without messing up our environment. Don't let big corporations bully you into doing what they want, do what is right for the people of Oregon. Thank you.
