**Subject:** not all vaccines are created equal--HB 3063- OPPOSE  
**Date:** Thursday, February 28, 2019 11:49:13 AM

---

This bill should NOT consider making the HPV vaccine a requirement! This vaccine is not recommended by many practitioners I have spoke with, and the negative side effects/death in teens is alarmingly covered up. I will not give my children the HPV vaccine. It it too new, it is too risky and I will provide education for sexual safety before I risk their lives to conform to being forced to administer this vaccine to them.

Regards,
