Subject: we oppose HB 3063
Date: Thursday, February 28, 2019 10:55:51 AM

We strongly oppose HB 3063.

As responsible, well-educated, tax-paying parents, my husband and I care for our children, ensure that their bodies are healthy with pure organic foods, that they are warmly dressed and protected from the elements, and that their minds and spirits are nourished and stimulated with public education.

Now the legislators are going to tell us that we don't have the right to make decisions about what goes into our children's bodies?

As a woman, I may legally choose to abort my unborn child, but I may not legally choose to opt out of vaccinations for my healthy child??

Please protect our freedom as responsible parents in America to make decisions about what is best for our children. An exclusionary bill like HB 3063 would violate these essential rights and harm our children's future.
