

Hello,

I oppose this bill. I moved to Bend OR from California shortly after the passing of SB 277. I was diagnosed with muscular dystrophy and through gene testing the doctors said my daughter is a carrier. There is a far greater risk for my child to receive a vaccine than most.

It's mind boggling to think the State would attempt to take my right to decide on a medical procedure for my child and to withhold her education for not submitting to a clear and massive risk. If this bill is passed I will certainly leave the State.

Regards,
Tommy Waldron
