Dear Co-Chair Dembrow and Power, and members of the joint committee on carbon reduction,

For approximately two decades humans have produced pollutants and greenhouse emissions for the selfish present. As a citizen of Earth, I can no longer justify allowing the present to be prioritized over the future. Currently, I cannot justify producing children in this world only for them to be at the detriment of a failing world. As such it is imperative that the "Clean Energy Jobs Bill" pass not for our own selves, but for the future. For too long humanity has looked for only the present. If in time action is made to preserve a future beyond ourselves and such legislation will preserve the Earth for future generations. For a Salem and world in which the beauty of this world are ruined, is one in which has truly failed. You may have allowed this failure, but I cannot! Only action can heal the future.

Regards,

Jordan Delaelia
