Good day,

I am strongly opposed to House Bill 3063 as it takes away my freedom of choice for what I know is best for my children. My religion does not allow for vaccinations and taking away that religious freedom goes against the constitution.

The list of ingredients, when researched, is mind boggling. Please see the list on the CDC website. The CDC website states clearly that one of the ingredients in vaccines is human-diploid fibroblast cell cultures (strain WI-38). What are MRC 5 human diploid cells?

MRC-5 (Medical Research Council cell strain 5) is a diploid human cell culture line composed of **fibroblasts** derived from lung **tissue** of a 14 week old aborted caucasian male fetus.

My religious beliefs are totally against any product that was made by using the cells of an aborted human.

There is much risk involved in each vaccine.

ANYTHING that involves a risk to my body or my child's body must come with a CHOICE.

Thank you and please vote NO.
