

To My Legislators,

I am writing to voice my opposition to bill HB 3063. I am not anti-vaccination, but I fear that this bill is glossing over important considerations.

First, the expression that vaccines are safe and effective fails to acknowledge that vaccines are the only medical product that are not held to the same safety standards as all other medical devices and products.

Additionally, there have not been double-blind placebo-controlled studies on vaccines, nor has the development of these products advanced enough to look at the long-term effects the current CDC recommended schedule has on the health of our children, and the role genetics and immunobiology play in their safety.

I encourage you to protect Oregon's children by demanding true vaccination safety studies, holding manufacturers liable, and removing big pharma lobbyists from the government.

Thank you for your time,

Rachel Jacobson
