

Hello,

I firmly believe in the freedom to choose what I feel is best for my own body as well as the bodies of my children. I do NOT support mandatory vaccines. Reacting to a sudden outbreak of the Measles to immediately implement a bill to require mandatory vaccines for all non medical exemptions is not the rational solution. It is a fear driven response and trying to play to the sensationalized aspect of the outbreak, when in reality, the danger is minimal (in my opinion).

We need time to discuss all sides of the issue and not just have a knee jerk reaction bill. As a parent and as a community member, I firmly oppose HB 3063.
