Lots of information has come out in the last few years about the harmful effects of vaccines. Lots of discussion about this issue. It doesn't make sense to just shut down all discussion and make laws that simply say "Shut up and get your darn vaccines". Just because something is controversial doesn't mean we should eliminate everyone's freedom to decide. "Controversial" is exactly the reason this should remain a choice. People have the right to decide what they put in their own bodies (and their kids).

Lawmakers exist to represent citizens, not the pharmaceutical companies' agenda.

People are now considered a threat just because they exist? Unfortunately, this is the mindset being trained into our brains.

Please do not pass HB3063.

Thank you.
