## VAERS (Vaccine Adverse Event Reporting System) Reporting Frequency

### Electronic Support for Public Health–Vaccine Adverse Event Reporting System (ESP:VAERS)

“...fewer than 1% of vaccine adverse events are reported. Low reporting rates preclude or slow the identification of “problem” drugs and vaccines that endanger public health.”

## Unvaccinated vs. Vaccinated

Oregon Health Authority Claims Health Outcomes of Unvaccinated Vs. Vaccinated are the same:  
<https://www.oregon.gov/oha/PH/PREVENTIONWELLNESS/VACCINESIMMUNIZATION/VACCINESAFETY/DOCUMENTS/VacQAparents.pdf>

### IOM 2013 Report

Concludes that Vaccinated vs Unvaccinated population studies have not been done

*“No studies have compared the differences in health outcomes that some stakeholders questioned between entirely unimmunized populations of children and fully immunized children”*

Concludes that the Entire Vaccine Schedule has not been tested

*“...studies designed to examine the long-term effects of the cumulative number of vaccines or other aspects of the immunization schedule have not been conducted.”*

<https://www.nap.edu/catalog/13563/the-childhood-immunization-schedule-and-safety-stakeholder-concerns-scientific-evidence>

Unvaccinated Vs. Vaccinated Health Outcomes

<https://antivakcina.org/files/MawsonStudyHealthOutcomes5.8.2017.pdf>

<https://www.putchildrenfirst.org/media/e.4.pdf>

Data Flaw – compares unvaccinated to a child receiving at least 1 vaccination (not similar at all to US Schedule of 49 doses by age 5) <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3057555/>

Federal Legislation introduced calling for a Study on Health Outcomes in Vaccinated and Unvaccinated American Populations <https://www.congress.gov/bill/115th-congress/house-bill/3615>

## Vaccine Schedule

CDC Schedule <https://www.cdc.gov/vaccines/parents/downloads/parent-ver-sch-0-6yrs.pdf>

## Hepatitis B Vaccine safety concerns

**Neonatal vaccination with bacillus Calmette–Guérin and hepatitis B vaccines modulates hippocampal synaptic plasticity in rats**

[https://www.jni-journal.com/article/S0165-5728\(15\)30029-1/fulltext](https://www.jni-journal.com/article/S0165-5728(15)30029-1/fulltext)

**Neonatal hepatitis B vaccination impaired the behavior and neurogenesis of mice transiently in early adulthood**

[https://www.psyneuen-journal.com/article/S0306-4530\(16\)30514-5/fulltext](https://www.psyneuen-journal.com/article/S0306-4530(16)30514-5/fulltext)

**IL-4 mediates the delayed neurobehavioral impairments induced by neonatal hepatitis B vaccination that involves the down-regulation of the IL-4 receptor in the hippocampus**

<https://www.sciencedirect.com/science/article/abs/pii/S104346661830190X>

Updated 9/22/2018

## **Oregon law on specific disease reporting and control measures**

**Students and Staff with blood borne diseases HIV, AIDS and Hep B cannot be excluded from school. Students/staff with HIV do not need to inform anyone in the educational system of their illness ...** HIV infection shall not factor into decisions concerning class assignments, privileges or participation in any school sponsored activity.

<https://www.oregon.gov/ode/students-and-family/healthsafety/Documents/commdisease.pdf>

## **Pertussis**

**Acellular pertussis vaccines protect against disease but fail to prevent infection and transmission in a nonhuman primate model.** <https://www.ncbi.nlm.nih.gov/pubmed/24277828>

**Lane County Vaccination Rates**
