---

To whom it may concern,  
I oppose the government telling me I have to inject my kids with mystery ingredients devoid of mandated safety checks. I oppose politicians trying to make medical decisions for my family without the educated help of our personal providers who know our medical history and situation. I oppose uneducated strangers making medical decisions for me or my children. Therefore I oppose HB 3063 and I sincerely hope you do as well.  
Thankyou for your time.
