

March 1, 2019

Chair Salinas and members of the House Committee on Health Care:

I am Susan Jorg, a graduate of Oregon State University, and I am opposed to HB 3063.

Since May 14, 1796 when Edward Jenner first scraped the pus from a cowpox blister and applied it to an open wound in the arm of James Phipps, governments have been involved in seducing their citizens to accept the practice of vaccination. Just as the side who wins the war gets to write history, the side with the most money and influence gets to write medical books.

Vaccination is the cornerstone of conventional medicine. Now that medicine in the United States is a for profit industry, vaccines are even more vital in keeping the pharmaceutical industry rolling in currency. "In 1973, Nixon, as a personal favor for his friend Edgar Kaiser, signed the Health Maintenance Organization Act which allowed hospitals, insurance companies, clinics and even doctors to function as for-profit entities." "These for-profit entities include incentives which adversely affect the doctor-patient relationships, creating conflict of interest which ultimately diminishes the quality of care and may also erode a patient's trust in the system, as well as their own doctor."

Since the passage of the 1986 National Childhood Vaccine Injury Act, pharmaceutical companies are free from liability if their vaccines injure or kill the recipient. Before the NCVIA, vaccine manufacturers were facing huge payouts for vaccine injury. Now they only profit and they don't have to invest in making vaccines safer because they're liability free. I bet the auto industry would like a sweet deal like this from our government.

Ever since 1986 the CDC has been adding vaccines to the childhood schedule, burgeoning from 23 doses in 1984 to 72 doses in 2018. (It was only 5 doses in 1963.) "Necessity no longer determines the validity of state childhood vaccination mandates.... New vaccine mandates are guided by financial returns on low prevalence diseases, not protection of the entire population against imminent harm."--N.Y. Law Professor Mary Holland

The CDC and state health authorities are now the marketing arm for vaccine manufacturers, using scare tactics to funnel consumers into vaccine uptake. They have also succeeded in making everyone blind to vaccine injury. Doctors and nurses are no longer taught to recognize vaccine injury, mainstream news will not report it, and coroners dismiss it as SIDS or SUDS in their reports. All bought and paid for by the pharmaceutical industry.

But the worst harm the NCVIA has done is to the citizens of Oregon and the nation who dutifully line their children up for vaccination only to become a statistic in the ever growing epidemic of auto-immune diseases. In 1960 3% of all children suffered from chronic disease, in 2011 it was up to 50% of children with no sign of downturn.

According to the Centers for Disease Control (CDC):

1 in 6 has a learning disability

1 in 12 has asthma

1 in 10 has ADHD

1 in 12 has food allergies

1 in 20 has seizures

1 in 40 has autism

Put this into the perspective of four people in Oregon now having to deal with a short bout of the measles.

Please consider the above statistics and withdraw your support from HB 3063. According to the Oregon Health Authority in a letter to the Governor last year, Oregon has continually high vaccination rates with statewide vaccination rates at 94%. The true unvaccinated rate is only 2.6% and these are the people who know they are vaccine injured and do not want to increase their exposure to the harm of vaccination.

Vaccine mandates run counter to informed consent and the Nuremburg Code: "The voluntary consent of the human subject is absolutely essential." This means that the person involved should be able to freely consent to or reject any treatment without fear of any punishment or loss of services. HB 3063 is coercive because it threatens citizens with lack of access to education unless they submit to vaccination.

Predatory corporations selling compulsory vaccines to children should lead to a high level of government scrutiny, not support. Please oppose HB 3063.

Thank you for your consideration on this matter,

Susan Jorg
