

To Whom it may concern,

I have been an Oregon resident for going on 5 years now. We were living in California, and concerned about the way the government was increasingly passing restrictive legislation. We chose to move to Oregon in part because of the importance and value its citizens and legislature seemed to place on safeguarding the rights of its citizens. This bill being proposed is deeply concerning to us as free American citizens. Holding children's education hostage and instituting a policy of discrimination against the unvaccinated or partially unvaccinated is not the way people of a free country act. We are solidly NOT in favor of this bill.
