

Hi,

I disagree with any governmental entity that withholds or denies education from schoolchildren and mandates vaccinations without religious or philosophical exemptions. This is coercion and governmental overreach. Vaccinations are a medical issue and should be left up to the parents to discuss with their child(ren)'s doctor. It is a parent's responsibility and right to do what they deem best for their child; they should not be obligated to get approval from anyone (church, government, physician), but should maintain the right to determine for which medical procedures they give their consent.

Please support medical freedom in all its forms and informed consent (BOTH parts are necessary), and oppose HB 3063.

Sincerely,  
Becca, Oregon resident
