Comments on HB 2020

I doubt anyone knows for certain what carbon does or doesn't do.

My name is Keith Campbell. I am 64 years old and have worked in the construction industry for 45 years here in Southern Oregon. I maintain a contractors license and have for 35 years. I work on homes and businesses with Sheetrock products.

I know a great deal about my business, however experience has shown me you control much of what I am allowed to do, and how I do it. That being said, your mandates are often suspect at best, often enough simply Punitive rule making. It is difficult to respect the onerous rules you so often impose on me.

Now with HB 2020 you are forcing the people into an expensive experiment that offers little chance of productive results, while creating economic suicide for reluctant citizens.

Your reliance on governance as opposed to government, and embracing stakeholders over citizen input puts you at odds with your sworn oath.

②

Legislators have enormous control over our lives, so they must be careful. You have a fiduciary responsibility to do no harm thru legislation. The health of our local economy has a great deal of effect on my livelihood, I insist you proceed carefully.

Finally, I suspect this exercise has little to do with the environment, and more to do with some perverted social justice endeavor. Please remember this is not a game, it is our lives, and the lives of our loved ones.

Thanks for your attention.
