

2/23/2019

My name is Olga Lachinova

I oppose HB 2020.

I'm a stay at home mom of three and live on the ranch in a rural area of Southern Oregon.

I believe that it is a very extreme and radical bill, that is not science based.

① There is not enough proof of climate change as of today. Climate is cyclical and there is not enough long term research to prove it.

I lived in Russia for 20 years and it's not happening there either. Each year is just a little different, sometimes colder, sometimes warmer.

② It will negatively effect economy, especially lower income households.

③ There is nothing you can do to stop climate change even if it is real while China and India or other 3rd world

country are producing so much.  
If they stop they will starve.

④ I'm concerned about issues  
like extreme smoke, waste  
of water and energy.

I believe that each citizen  
has their own responsibility  
to not waste the energy  
or pollute the environment.

There are some much less  
radical ways to do so.

It is not just about  
climate change.

Air quality due to bad  
forest management and  
big fires as a result  
are really dangerous and  
kill and destroy more.

Please use your common  
sense and logic.

Thank you.
