

Dear Hose Committee,

I have several questions that need to be addressed if this bill passes.

1. Are teachers and all school employees going to have to make sure they are all up to date and SHOW proof like students?
2. Do all visiting adults to school (like parents who come for career day or special guest) have to show proof of their status?
3. What steps are in place to supplement the parents income who have to home school their children? Families will have to go down to one income as to no compromise their religious believes.
4. Aborted fetal cells are listed as ingredients in the vaccine insert. Will churches be forced to close their day cares and preschools since they couldn't possibly support those ingredients?
5. Since this bill discriminates against my children to access public school, and I pay taxes to support public school, what is the process to get my refund for this tax?
6. Since this bill be force many to home school, what will the process be to funds from the state to purchase curriculum, tutors and extra curricular activities?
7. What kind of tax credits will be given to families who have to limit their employment when their child can't access public school or aftercare programs?

Thank you
Angela Ranney
