

Vaccines are nothing but a racket! Lets keep America sick scared and stupid! I had the measles when I was a kid and so did all of my sibings and friends, no-one died. Why should we be forced into vaccinations, why should our children be forced into them. There should be a list given to people with the ingredients of these vaccines, I doubt people would want that in their bodies, especially their children. Lastly, we had like 3 vaccines as children, kids now getting like 80 or something before they are even 5. That sounds excessive, no?

NO TO forcing people to get vaccinated and YES to letting people choose!
