

Dear elected officials,

I do not support HB 3063 and strongly urge you not to either. This bill is being proposed in haste and has the potential for lasting negative consequences for children and parents.

Removing the option for non-medical exemptions tramples on religious rights and the rights of parents to make educated medical choices for their children. There is already a system in place for getting educated and then choosing an exemption if it's what's best for my child.

We DO vaccinate but not on the proposed schedule and not all vaccines recommended. I wish to retain my right to choose this based on what myself and my child's board certified pediatrician have determined is best for her.

This should not cross over into my child's right to receive public school education which we pay for through our taxes.

As elected officials it is your duty to represent all constituents this includes parents who make different choices based on religious beliefs, personal beliefs and me and my child's unique health situation supported by our pediatrician.

Thank you for representing the rights of ALL constituents and making medical choices the business of myself, my child needs and our pediatrician.

-Casey
