

To Whom It May Concern,

I am writing a letter of support for HB2797. This is important bill which will put in place a mandatory sentence for individuals who sell or manufacture a controlled substance. It is my belief that all parties who distribute drugs should face jail time when an individual dies from an overdose. I ask myself, why should people who distribute these drugs, still be walking the streets. They bare some blame for a death and should be prosecuted for their deed. They should not be allowed to profit from a person's death.

Oregon's children need your support for this bill. Their lives depend on your vote in favor of HB2797.

Thank you,
