

Greetings,

I am writing to urge you to support, advocate for, and pass a strong climate protection bill.

I live in Portland OR. My partner and I are raising a child who deserves a stable, habitable climate. I enjoy skiing, the outdoors, and drinking clean water from the Bull Run Reservoir. Climate change is beginning to impact these things, my life, my daughter's and billions of other humans. We need to do something meaningful to begin to reduce carbon emissions if we are to pass on a habitable and stable society for our daughters and sons.

I urge you to pass strong legislation to help prevent catastrophic climate change. Please make sure the companies polluting our environment are forced to reduce their carbon emissions. Please make sure there is clear accounting and measuring of outcomes. Please make sure that low income communities impacted by this legislation are not punished by the polluters passing on their costs. Please help lead Oregon, the US, and the world to prevent climate disaster.

Thank You,
John Peterson
