

To Representatives on the House Health Care Committee:

My name is Laurie Solisz. I am an RN with over 42 years experience in the acute care setting.

I urge you to defeat HB 3063 which seeks to remove the non-medical vaccine exemption from Oregon Law.

Vaccinations have a long history of being unhealthy for human beings. The long term studies have NOT been done due to laws against double blind experiments using human beings as subjects.

The vaccination adjuvants cross the blood brain barrier and jeopardize long term well-being manifesting in brain damaged people, young and old, as well as other unacceptable side affects, including death.

Please defeat this bill that is not in the best interest of the constituents you serve.

Sincerely, Laurie Solisz

Laurie Solisz
