

Hello. I am a 74 year old retired clinical social worker living now in Oregon to be close to and support my daughter, her husband and their 3 (adorable) children. I write to enthusiastically support the Clean Energy Jobs bill, HB 2020.

HB 2020 will benefit our economy by creating 50,000 good paying jobs. With the declining cap, a guarantee of a reduction of 2 million metric tons of pollution will occur annually. This is equal to a decrease of 425,000 cars. No insignificant amount of pollution reduction. With the passage of HB 2020 a positive impact for all Oregonians will occur.

Please support the passage of this bill. Thank you for this consideration.

Sincerely,

Susan Weinstein
