

Choices and Unintended consequences.

H.B.2020 would tax or regulate many business out of business for carbon emissions. That would force U.S. companies to purchase products,ie: cement,from China or elsewhere. They have little or no emission standards, then have increased transportation emissions to get the products to the U.S. Thus, a significant increase in total carbon emissions to the planet. Many products currently produced locally would be taxed out by 2020.

I know you can read this, but did you really LISTEN!
