

Dear co-chairs Dembrow, Power and the members of the joint committee on carbon reduction:

My name is Svevo Brooks. I am writing to strongly support HB 2020 and hope you will do the same.

As an elementary school teacher I find climate change extremely worrisome. What will the future be like for these young children? Are we limiting their potential by ignoring the obvious erosion of the planet?

Climate change is not something that might happen in the future. There is overwhelming evidence that it is NOW. Trees are dying. Seas are rising.

Act NOW to give children the opportunities they deserve.

Thank you for your consideration.

Svevo Brooks
