

My name is Kim Magnuson. I live in Ashland. I hope that you will support HB 2020. Similar bills have been passed in other states and 10 states already have successful cap-and-invest programs running. After years of experience, all of them have growing economies, falling CO2 emissions, stable energy prices, and thousands of jobs created. Oregon should be next. We cannot afford to not reduce carbon emissions.

The attached graph is from epa.gov

Please support HB2020. Thank you very much.
