

Dear Representatives,

I am writing you today to urge you to vote no on HB 3063. This bill is unconstitutional and would be taking away rights from parents and children. As an Oregonian for almost twenty years, I have always loved this state and the freedoms it gives my family and me. I can see these rights starting to be taken away and it is going to negatively affect our great state. First and foremost, it will have a huge impact psychologically on the thousands of children, who will be told they are no longer welcome in their own school. Being isolated like that will increase the depression rates of children/teens in this state and may increase suicide rates as well. Secondly, Oregon's economy will suffer due to the thousands of families who downsize and switch from a two income family to a one income family, so a parent can stay home and homeschool their children. This could increase Oregon's poverty rates. Families will also just pack up and move to another state which would also have a negative impact on Oregon's economy.

Many families have already suffered vaccine injuries and still do not qualify for medical exemptions. Do the lives of these children not matter? You are just expecting them to get the vaccines and risk another injury?

All parents want what is best for their children, but forcing parents to choose between education and medical freedom is not going to help the situation. The lives of the unvaccinated children and the vaccine injured children matter just as much as the vaccinated children do. There has to be a better solution that you can come up with that does not intrude on parental rights to medical freedom nor take away the right for ALL children to an education.

Please vote no on this bill.

Thank you for your time,  
Rayetta Griswold,
