

Hello Oregon Representatives,

I wanted to pass along the following information provided by the CDC regarding the MMR vaccine. On the CDC's website it says, "Some People Should Not Get This Vaccine" and provides additional supporting information. I've included a screenshot and also provided the link to the page. <https://www.cdc.gov/vaccines/hcp/vis/vis-statements/mmr.html>

Please reconsider mandatory vaccines for Oregon children. Not everyone can tolerate these vaccines. Especially when there's no option for a single shot.

Thank you for your time!

A proud Oregonian

Some people should not get this vaccine

Tell your vaccine provider if the person getting the vaccine:

- **Has any severe, life-threatening allergies.** A person who has ever had a life-threatening allergic reaction after a dose of MMR vaccine, or has a severe allergy to any part of this vaccine, may be advised not to be vaccinated. Ask your health care provider if you want information about vaccine components.
- **Is pregnant, or thinks she might be pregnant.** Pregnant women should wait to get MMR vaccine until after they are no longer pregnant. Women should avoid getting pregnant for at least 1 month after getting MMR vaccine.
- **Has a weakened immune system** due to disease (such as cancer or HIV/AIDS) or medical treatments (such as radiation, immunotherapy, steroids, or chemotherapy).
- **Has a parent, brother, or sister with a history of immune system problems.**
- **Has ever had a condition that makes them bruise or bleed easily.**
- **Has recently had a blood transfusion or received other blood products.** You might be advised to postpone MMR vaccination for 3 months or more.
- **Has tuberculosis.**
- **Has gotten any other vaccines in the past 4 weeks.**
