Dear Legislators,

I'm writing to voice our support for the Safe Waters Act of 2019. I believe it's possible that anybody could potentially want to drink the fresh water from any stream, creek, river, or lake in our state, so I see this as applying statewide. It's well past time that we re-focus on producing a sustainable economy that protects and enhances our health, rather than allowing international companies to rape our wild lands and send the profit beyond our borders with very little local benefit retained, if any.

Don't be timid. Be the change that we need to see.

Thank you.
