

Honorable Members of House Committee on Health Care and Legislators in the House and Senate,

I implore you to OPPOSE HB 3063! There are considerable amendments that would HAVE to be included in order to protect against those most vulnerable to vaccine injury or serious religious and socioeconomic discrimination. There are more than 35,500 students this would immediately impact here in Oregon!

Please consider these important amendments for those who are currently in favor of HB 3063:

- Pre-screening for mitochondrial disorders and genetic susceptibilities, including but not limited to MTHFR
- Vouchers for private school. Thousands of Oregon families would fall onto undue hardship without this, and they are all tax-paying citizens who deserve to be treated equally and fairly.
- Access to online education. For those that would opt to homeschool, online education access is critical!
- Allow for religious exemptions
- Broadening of medical exemptions to include family medical history and other important precautions and contraindications outlined by the manufacturers in the actual vaccine inserts (even the CDC I believe added more precautions and contraindications re: family autoimmunity recently to the MMR; previous vaccine injury in said student OR family member MUST be included).
- Mandatory reporting of Oregon VAERS data and publishing that data online to better monitor injury for Oregon. 4 deaths were listed last year for Oregon VAERS data, and 19 disabilities! These injuries matter.
- All administrative and teacher staff need to be fully up to date if children are being asked for the same
- Keep recently vaccinated students home quarantined when a live virus vaccine has been administered to keep from shedding on others including the immunocompromised
- Grandfather clause with checkpoints (Kinder and 7th is what CA has)
- Kids with an IEP to be exempt
- Remove the OHA education piece
- Any product that is currently under investigation or in court being sued cannot be mandated
- No mandates for vaccines with an efficacy rate lower than 80%
- Remove Emergency Clause! This as it stands now would not allow for even safe administration of vaccines on a schedule that would be deemed safe by doctors.
- Allow for students to safely finish their year of school to protect against immediate hardship and the real possibility that the mental health of the students would be severely negatively impacted.

Again, I URGE you PLEASE: Do NOT support legislation that would wrongfully discriminate and potentially segregate more than 35,500 students out of their right to an education here in Oregon.

Kind Regards,
Amber
