

People deserve the right to choose or deny ANY medical treatment for themselves or their children, after being fully informed of the risks and benefits of both alternatives.

Put the shoe on the other foot and consider if YOU were in a group mandated for medical treatment you would otherwise eschew or choose to pursue on a different schedule. Do not for one moment think it cannot happen to you because you are proposing to do it to others.

Segregation in this country was an abomination, yet here you are, determining it should reoccur. Different criteria does not make it right.

If the points above have no impact on you:

Consider the following amendments to HB3063

- IEPs should be taken into consideration
- Add check points vs mandating a blanket effective-immediately act
- Allow for religious exemption NOT contingent upon membership in any church or religious organization
- Grandfather in those with existing exemptions
