

The Burden of Proof – Tobacco Industry Tactics, No Real Placebos

March 11, 2019

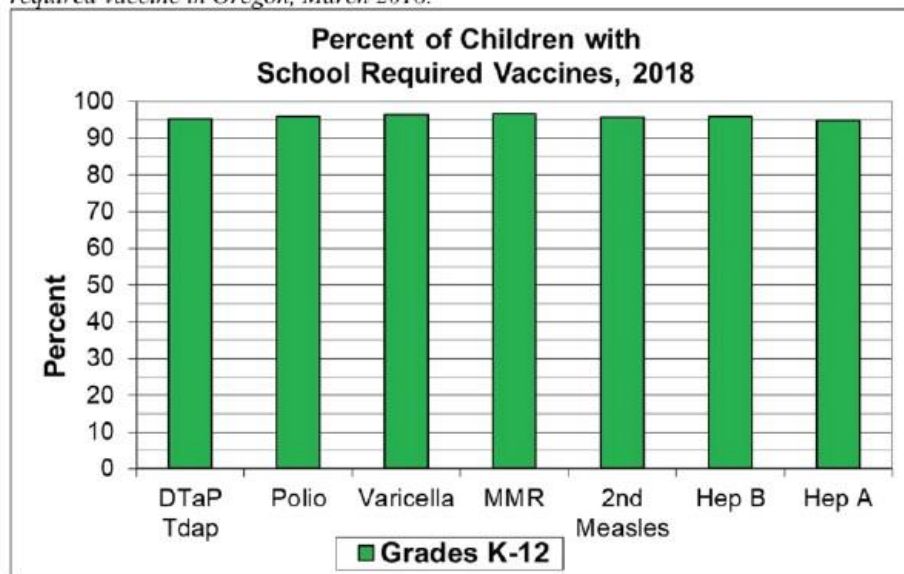

Thank you Chair Salinas and members of the House Committee on Health Care,

HB3063 has been scheduled for a work session despite a rather large body of evidence and testimony against it, including multiple professional and personal testimonies from your constituents.

Oregon has exceeded the desired herd immunity rates for all vaccinations. There is no epidemic to put emergency status on propaganda legislation.

This chart was provided to Governor Kate Brown by the Oregon Health Authority in April 2018, showing high vaccination rates for all school required vaccines:

Figure 1. Percent of children in kindergarten through 12th grade complete for each school-required vaccine in Oregon, March 2018.

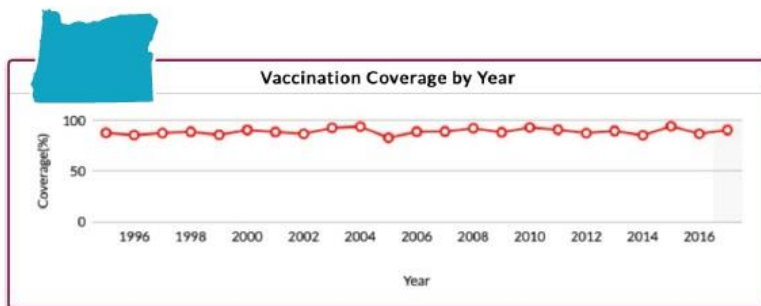

April 30, 2018

Page 1

The graph below there has never been a decline in MMR vaccination rates in Oregon. According to OHA, the measles vaccination rate is currently 95.6% for K-12 students.

This graph shows MMR vaccination rates in Oregon since 1995 (chart provided by the CDC). There has never been a decline in MMR vaccination rates in Oregon. According to OHA, the measles vaccination rate is currently 95.6% for K-12 students.

Source: Centers for Disease Control, Measles, Mumps, and Rubella (MMR) vaccination coverage among children 19-35 months by state, HHS region, and the United States, National Immunization Survey-Child (NIS-Child), 1995 through 2017.

The Burden of Proof – Tobacco Industry Tactics, No Real Placebos

The CDC website states that all vaccines can cause side effects, including seizures, brain encephalitis, and death¹.

Reported Vaccine Injuries and Deaths for Oregon

Source: <https://vaers.hhs.gov/>

	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
Number of cases	542	470	417	400	374	451	465	673	484	579
deaths	2	1	2	1	1	2	1	2	1	4
disabled	7	8	2	2	5	5	4	6	10	16
life threatening reactions	7	10	8	5	10	10	4	4	10	4
hospitalizations	20	19	19	15	12	11	13	10	19	19
emergency room	147	149	125	132	108	124	122	128	59	10

In fact, in 2018 alone, there have been more reported deaths from the MMR vaccine, then from actual measles since 2003, in the USA. Additionally, most vaccine package inserts state in **section 13.1** that "*Carcinogenic potential, mutagenic potential, or impairment of fertility have not been evaluated*".

The Burden of Proof lies on the sponsors and lawmakers supporting this bill, **yet there has been no gold standard testing done for vaccines against an inert (saline) placebo!** We only have "TOBACCO SCIENCE"! Tobacco industry tactics involves using sophisticated public relations approaches to undermine and distort the emerging science.

In the United States, there has been zero testing to compare the fully vaccinated vs. the fully unvaccinated, to prove one group healthier than the other, or to prove that vaccines are safe and effective as they are administered according to the current vaccine schedule. **How can the sponsors of this bill claim that children missing one or more vaccine doses are a threat to others without providing any scientific proof?**

There is a substantial risk that comes with a one-size-fits-all approach to "preventative" public health, especially when we are referring to liability-free pharmaceutical products containing controversial toxic chemicals and other additives that have not been studied for their synergistic effects. This bill and any legislator supporting it are in direct violation of our Constitutional rights, as we have a right to informed **voluntary** consent without coercion! The Hippocratic Oath and the Nuremberg Code cannot be ignored! This bill is unethical, holding a child's education hostage in exchange for a medical procedure, and **WE DO NOT CONSENT**. Willful ignorance, in an age of knowledge readily available at your fingertips, is a choice, and any legislator who refuses to acknowledge the lack of proper safety studies and instead chooses to be deliberately ignorant on the matter constitutes the petition for their removal from public office.
