

To Whom it may Concern:

My name is Lisa Stewart and I am writing to urge you to oppose HB 3063 on the grounds that mandating **any** kind of medical procedure, which includes mandatory vaccinating, is wrong. This country was founded on freedom and what is the greatest freedom if not medical freedom to choose what is best for ourselves and our children?

Where there is risk, there must be choice. And there are simply too many people who have been injured by vaccines to look at this lightly. If you choose to pass this bill, those who are injured in the future will have been injured by **you** and all those who chose to force a medical procedure on the citizens of this state.

Considering that more people have been injured by the MMR vaccine than have died from actual Measles in the last 20 years, this rush to pass a bill which forces parents to do what the state wants is very wrong!

I sincerely hope you stop to consider the terrible precedent this will set for forcing parents to commit medical procedures on their children without their approval. The state is not our parent.
