

On eve of another hearing for HB 3063, I ask you to please vote no on this bill.

The Advisory Commission on Childhood Vaccines quarterly meeting presented a report from the DOJ with info regarding vaccine injury compensation from NVICP.

"The [March 8, 2019 report](#) states that 307 petitions were filed during the 3-month time period between 11/16/18 – 2/15/19, with 153 cases being adjudicated and 125 cases compensated"

Over \$110 million has been compensated just in 2019! Remember, the HHS estimates fewer than 1% of vaccine injuries are reported. Vaccines are NOT safe for all.

Information about the report, links to past reports and additional sources can be found here:

<http://healthimpactnews.com/2019/2019-doj-report-on-vaccine-court-reveals-vaccines-continue-to-injure-and-kill-people-110-million-in-damages-paid-out-first-quarter/>

Mandatory vaccination is not safe, not morally right, not constitutional, and not beneficial for all. VOTE NO.

Read through this entire trasncript of Dr Stanly Plotkin (or watch/listen to the deposition on YouTube). It is full of truth about how they developed, experimented on people, made mistakes with (costing lives), and lied about vaccines and their safety.

Do not mandate them. Let my children stay in school and let me choose how I will raise them
