

To whom it may concern,

Our dear friend's son is suffering from Krabbe which could have been treated if it had been found earlier on...we pray that screening for Krabbe will be a regular test so that other families don't suffer the way that Emmett Monoco's family has.

It's excruciating to think that his fate would have been completely different if it had been found early & treated. Unfortunately it's too late for Emmett as the disease is too progressed to treat. I hope that his life will help others avoid this suffering. Please make Krabbe screening a regular test to prevent this.

Thanks for your time,

Corey Gregg
