Dear Gentle People,

I am so delighted to know you are in the process of reclaiming what has been gradually diminishing over the years - our clean and abundant water supply. The Oregon Safe Water Act HB2656 is a large step in the direction of safe guarding our precious fresh water resource.

I am glad you will be ending the devastating clear-cutting, road building and spraying practices that have had such a negative impact on not only the water but the wildlife, species diversity, our salmon and steelhead and the natural beauty of our glorious State.

Thank you from me and future generations to come for your conscientious action on this vital legislation.

Bill Kucha
