

Dear House Health Committee,

This CDC link contains instructions and a screening checklist that all doctors are supposed to follow before giving a vaccination to anyone.

<https://www.cdc.gov/vaccines/pubs/pinkbook/vac-admin.html>

My own pediatrician didn't know about this or follow it. There is no way dentists will be able to do this properly. Dentists are not trained in vaccine adverse reactions. They are only interested in the new billable line item.

Please keep the medical procedure of vaccination in the proper setting between a doctor and patient. Let dentists stick to teeth. Please do not pass this bill.

Thank you,
Sandra Ganey
