Dear Chair Dembrow,

It is ridiculous to place restrictions on any business based on one farms failure to comply with State and Federal laws. That is what seems to be happening here . The failure of one Eastern Oregon dairy to meet standards that other dairies have been able to comply with. One of which is less than 20 miles away from the noncompliant one. Maybe the real question here is not more restrictions but are the regulations that we currently have being enforced soon enough by the existing regulatory agencies that are already in place?Please think twice about these two Bills and put the pressure on the agencies that failed us. Thank you

Sincerely,

Tim Emerson
