

Hello All,

I strongly urge you to vote no on HB 3063. Overreaching governments were the reason America was founded and this vote drives to the heart of our founders vision. While this is just one vote for a small change, the shift in balance of power is monumental. Don't just think about today. Imagine the power this gives the next elected officials, and the ones to come down the line. If you vote this in there is no going back and I don't believe the threat warrants the removal of medical freedom.

Please vote for Freedom!

Kind regards,

Tommy Waldron
