

Hello,

I am writing to you as a very concerned Oregonian in regards to HB 3063. I have a family history of adverse reactions to vaccinations and I myself have ended up in the ICU as a Type 1 Diabetic the same week I received a flu shot - 3 times...3 TIMES! There is no one size fits all with vaccinations, unlike the multiple options of pharmaceuticals that many individuals have to choose from today that works best for their bodies. Informed consent is a right to every human being as well the right to an education.

I urge you to research adverse reactions, read every full vaccine insert (not the information pamphlet), the 1986 legislation that removed liability from vaccine manufacturers and doctors, interview vaccine injured families and vote no on HB 3063.

My question for all of you is, if you believe in vaccines this much, would you willingly take on full liability for any and all adverse reactions or deaths due to mandatory vaccines?

Respectfully,

Micayla Gavin
