

Dear Representative,

Hi, my name is Eva Mametieff. My husband was born here, I've lived in Oregon for 27 years. We have 4 children. I am writing to ask you to please oppose HB 3063. Honestly this is a very scary time in our history. To give away our medical freedom and put it in the hands of a pharmaceutical company to choose for us is absolutely insane to me. I don't have a vaccine injury story. Although it makes me sad that so many parents with vaccine injuries are not being heard. I've been doing some research and trying to see both sides to this. I understand that people with compromised immunity are at risk. But why does that child get to go to school but my child, who I chose not to vaccinate because I feel the risk is just too high, will not be able to go. Who is looking out for my children? There has got to be a better way for all. Please, let's figure this out where it is fair for all. My children rarely get sick. They have a strong immune system, and we try to eat healthy. I attribute this to them not getting the vaccines. Why don't we have studies of the health of vaccinated children and unvaccinated children? Why is this all being suppressed? Let's do the studies. Let's work together. I am pleading, please oppose bill 3063.

Sincerely,

Eva Mametieff
