

Diana Oxley <dianaoxley@gmail.com>

Chair [Helm](#), Vice Chair [Reschke](#), Vice Chair [Schouten](#) and Members of the Committee:

My name is Diana Oxley. I reside in the South Burlingame neighborhood of Portland. This neighborhood borders the I-5 freeway. Two elementary schools sit just above the freeway, literally a stone's throw away. Research conducted on the ill effects of freeway pollution showed that children within 1/3 of a mile developed health problems caused by this pollution. The carcinogenic content of diesel fuel is well established. Is it not time to eliminate this carcinogen and reduce highway pollutants for the sake of community members' health? Is it not time to exercise your responsibility to represent us who elect you and not transportation lobbies that fund your campaigns? Actually, it is past time. Do the right thing! Back policy that reduces your reliance on funds from the industries you are supposed to regulate. Help Oregon earn its reputation for environmental protection.

Please support HB 2007.

Thank you,
Diana Oxley
