

Rebecca Canright <rebeccagroovypeace@gmail.com>

Hi there!

As a college student who cares deeply about protecting clean air and water, I strongly support HB 2007, also known as the Diesel Bill. This bill directs the Environmental Quality Commission to adopt by rule diesel engine emission standards for medium and heavy-duty trucks. These emission standards will reduce particulates, improve air quality, and bring Oregon up to the standards in California and Washington.

Thank you for your time and kind consideration! Please again support HB 2007.

Have a wonderful day.

Sincerely,  
Rebecca Canright
