

Good morning Oregon Representatives,

This just came up in the news. They aren't calling it mumps but similar to mumps. The military is highly vaccinated. I would not be surprised if this outbreak was vaccine induced. We see stories like this pop up all of the time. Just more evidence that mandatory vaccines are not the solution. Here's a link or feel free to do a Google search:

Please vote NO on HB 3063

Thank you for your consideration.
