

**HB 3084 STAFF MEASURE SUMMARY**

**House Committee On Natural Resources**

---

**Prepared By:** Kailey Kornhauser, LPRO Analyst  
**Sub-Referral To:** House Committee On Revenue  
**Meeting Dates:** 3/26

---

**WHAT THE MEASURE DOES:**

Prohibits tax on use of suitable material other than virgin material for daily cover at a disposal site.

**ISSUES DISCUSSED:**

**EFFECT OF AMENDMENT:**

No amendment.

**BACKGROUND:**

The Environmental Protection Agency (EPA) requires landfill operators to place a six-inch layer of cover on top of a landfill every night. A landfill may be covered by either top soil from the surrounding area, or alternative daily cover (ADC), which is typically composed of used construction materials that have been ground by a recycler into powder. The materials used to create ADC would otherwise be disposed of in the landfill. The Department of Environmental Quality (DEQ) approves alternative daily cover designs or procedures. In 1995, the Oregon legislature added language to statute prohibiting the DEQ or Metro from charging a fee for use of ADC, as an incentive to encourage development of ADC.

House Bill 3084 would prohibit a tax on the use of suitable material other than virgin material for daily cover at a disposal site.
