

Dear Chair Barker,

I am pleading with the legislature not to enact this bill 3031. We operate a small family orchard, 5th generation. We have lost money for the last two years. We have no way to control how much we are paid each year for our crop and cannot absorb these continual added costs of operation. When I read through the bills that are constantly proposed it honestly seems like there are two things the legislature hates the most - that is "Employers" and "Farmers"! Very sad for our future.

Sincerely,

Susan Gay
